

You're invited to the PECO Infrastructure Academy!

A two-day class that includes a company overview of PECO, mock interviews, and assessment demonstrations of how to safely work in craft positions. Participants will:

- Receive hands-on experience and guidance from PECO crew members to learn what area best suits them.
- Work with a PECO partner to prepare for professional exams (Construction and Skilled Trade Selection System, AMO) along with basic life skills and training.

Representatives from PECO partners, including other employers, will be on site to share opportunities. Since the inception of the Infrastructure Academy, 60 attendees have been hired.
